

## REFERENCE – Pool, natural swimming pond Garden hotel Ochsenberger, Austria

**products:** VITAL 2"

The Garden hotel Ochsenberger in St. Ruprecht an der Raab reveals with its name that the environment of the hotel is very important.

Located in the middle of the "Garden of Austria" - Eastern Styria, guests enjoy the lovingly designed complex, surrounded by gardens with an extraordinary variety of plants.

Ochsenberger's Kraftgarten is an enchanting place for relaxation, with a natural swimming pond whose crystal clear water invites you to cool off on hot days, a koi pond and secluded spots or the meditation place.

After installing a water revitalization device EWO VITAL 2" in the circulation, a significant improvement in the water quality in the natural swimming pond is visible.

**The natural equilibrium of the pond has been established within 2 years, so no further water treatments are necessary.**

The natural water revitalization by EWO in the natural swimming pond system represents an environmentally-oriented solution for the Garden hotel Ochsenberger, which, as the holder of the Austrian eco-label and the European eco-label, is considered a real pioneer, with the commitment to an environmentally friendly orientation and linking a sustainable business with entrepreneurship.
