

## REFERENCE – drinking water Himmelschlüsselhof, 3242 Texing, Austria

**Products:** CLASSIC, VITAL

Located in the beautiful Texingtal in the Lower Austrian Prealps, this social-therapeutic working and living community for disabled people was founded in 1991 as an association.

This institution offers mentally and multiply disabled people not only a loving care in a family-like environment, but also a meaningful employment in the connected farm.

Ms. Fischer, the founder and honorary leader of this organization, is actively supported by her daughters and a qualified team in the care of these mentally and physically disadvantaged people.

Of course, good and comprehensive care also includes covering the most elementary needs, such as wholefood and drinking.

In order to give only the best to the protégés entrusted, agriculture, after all about 17 hectares in size, is guided by "Demeter" (biodynamic) guidelines.

ewolution of water

Even the best drinking water is part of a complete diet. This is how Ms. Fischer finally came to EWO's natural water revitalization. Convinced of the quality of the products and the natural mechanisms, several EWO devices were finally purchased.

In addition to an EWO device for the activation of drinking water, devices were installed to improve the water quality in the swimming pool and in the two operating heating systems as well.

*„After several months of use of the EWO devices in drinking water and in the swimming pool, we are enthusiastic about the effect of these products and the improved water quality. Not only that residents and co-workers already rave about the good water quality while drinking their morning coffee, also in the swimming pool with the therapies the improved water quality is noticeable.“*

Ms. Fischer, founder

Ms. Fischer is convinced, that in the heating systems the EWO appliances will certainly have the same effect.
