Many already **SUCCESSFULLY TRUST** in EWO® technologies

Mohammed Ali AL-Harazi, our partner in Saudi Arabia and the Gulf States, has carried out a test at **RAWABI FARM** in Saudi Arabia in the period from September to November 2020.

Purpose: Effects of water, optimized with EWO®, on tomato plants

THE RESULTS ARE CONVINCING AND OBVIOUS!

Many already SUCCESSFULLY TRUST in EWO® technologies

Installation of EWO® CLASSIC

The test took place in this part of the greenhouses

PLANTS FROM THE TEST

Two plants were not watered for 18 days after the test.

Left: normal water

RIGHT: EWO® WATER

These are two plants which were in the presentation we left them for 18 days without water
The long one is EWO it grew longer without water the dead one is normal water.

OBVIOUS TEST RESULTS:

- + stronger root growth
- + denser root balls
- + longer roots
- + denser foliage
- + higher color intensity
- + stronger stems
- + bigger plants
- + more resistant plants
